# HEATING & AIR CONDITIONING SYSTEMS

## BOILERS

The Buderus product program offers everyone the correct gas heating. Whether a detached house or multiple-family dwelling, a Buderus gas heating boiler offers comfortable warmth & reliable warm water always.

**Buderus**

**WEIL-McLAIN**

Weil-McLain offers a wide range of energy-efficient, high quality gas and oil-fired boilers for residential heating and gas-fired, oil-fired & combination oil/gas boilers for commercial use.

## IN-FLOOR HEAT

- Radiant floor heat provides numerous benefits, including increased comfort, even temperatures, cleaner air, no cold drafts, no unsightly ductwork & no floor vents, all while being quieter & more energy-efficient compared to forced-air heat.
- In a radiant floor heating system, warm water flows through tubes located underneath the floors. That warmth radiates up from the floors & warms everything it comes in contact with - including people.
- And radiant is compatible under any type of floor covering - carpet, wood, slate, tile, linoleum & even concrete - making design possibilities endless.

## GEO-THERMAL

**BOSCH**

Invented for life

The ultimate in performance! The luxurious two stage unit available from 2 to 6 tons features quiet comfort while its energy efficiency makes it the best-in-class in operating cost savings.

**WE PROVIDE QUALITY & PERSONAL SERVICE. WHETHER IT'S INSTALLATION OR MAINTENANCE THAT YOU'RE LOOKING FOR, MIC'S PLUMBING & HEATING IS THE WAY TO GO!**

## RADIANT HEAT

**RG ROBERTS GORDON**

Residential & Commercial Low-Intensity Infrared Heaters generate energy which is converted into heat when absorbed by floors, animals, people & objects. This energy is then re-radiated to warm the surrounding area by convection.

## DUCTLESS HEAT

**Halcyon** By **FUJITSU**

### Functions

19-SEER cooling-only & heat pump systems provide almost a 60% increase in efficiency over conventional 13-SEER models & feature ultra compact size, R-410A refrigerant, quieter operation & increased energy efficiency. Indoor units are over 30% smaller than competing units, making them easier to install in more locations. These are great for applications with homes that do not have pre-existing ductwork.

### Applications

The flexibility of the variable speed compressor helps systems adapt to shifts in heat load by occupants or fluctuating heat generated by computers. Fujitsu brand ductless air conditioners can be used to solve various application specific problems. With more efficient zone control, "ductless mini-splits" are perfect for renovations, restorations, conversions & add-ons.
